

# Weekly Report 10

---

Akshay Thontakudi, Varun Lahoti, Gerardo Molina  
November 2, 2018

## PROGRESS

This week was spent refining CAD designs to present to the client. We have also set up a meeting time with him next week to show our designs and get feedback from him.

## QUESTIONS

For the Group:

- How should we balance explaining the engineering/technical aspects with the physiological consequences to the client?
- Should we update the website once we have a finalized design (or wait because of patent related issues that could arise) ?
