November 16, 2018

## PROGRESS

This week we continued to refine the designs that we will be presenting to the client. Further journal research was done and recorded in LabArchives that will help with avoiding pitfalls when designing a device for using in cardiothoracic surgery. In addition, all of the weekly reports have been uploaded onto the webpage. We have also begun working on a plan for the upcoming progress report.

## QUESTIONS FOR THE GROUP

How do we want to divide up work for Thanksgiving break?

Should we work on the report remotely over break using Google Docs?
