

Weekly Report 6

Akshay Thontakudi, Varun Lahoti, Gerardo Molina
October 3, 2018

PROGRESS

Most of this week was spent working on the preliminary report. Some of the notable tasks accomplished include finalizing design specifications, creating a Gantt Chart, and updating the resources with google searches and publications the group found during literature search. The group has also delegated the presentation order. Varun will be presenting

The group will plan to contact Dr. Eghtesady to verify the design specs and move forward with creating initial CAD drawings in the next two to three weeks.

QUESTIONS

For the Group:

- How do we want to organize the material for upcoming presentation?
- When should we meet this weekend to prep for the presentation?

For Prof Klaesner:

- What are common mistakes groups make during the presentations?
- How much time should we allocate to each part of the presentation?
